RAYGEL VS. RESIN JOINTS

Raygel products are the joints of choice for many contractors. They're as easy as 1,2,3...

1. Joint the cable in usual manner

2. Place joint into Raygel enclosure

3. 'Clip' the box shut and power it up

- Time Saving**

No cable prep required

No mixing of resins – Raygel enclosures are prefilled

No curing time – Raygel enclosures can be energised immediately

- A Raygel joint can be completely submersed in water – the PowerGel is hydrophobic and repels water.

- The Raygel range is extensive, some include connectors, others do not, they are range taking & accommodate a large variety of cable types.

- Can be ordered as a complete kit (including connector) or just as a joint enclosure
- Cost effective, Raygel enclosures are cheaper than the resin alternative and faster to install, saving even more money reducing labour costs
- PowerGel is completely safe for the user, there is no nasty gases like with resins

Priced From

\$31.08
EXCL GST

Raygel Connections Mean...

1. No more sealing resin shells

2. No more dangerous Chemicals

2. No more messy resin

APPLIANCE TEST TAGS

STANDARD TAG

- The "Great All Rounder" suitable for most environments.
- Constructed from Cross-Laminated High Density Polyethylene giving them superior tear resistance.
- Laminated with a seal down Security Flap. Self Laminating to protect printed information.
- Each Test Tag has a unique Tag number.
- UV Stable.
- Supplied in re-sealable packets of 100 with permanent marking pen.

HEAVY DUTY TAG

- Formulated to withstand Hostile Environments.
- 35mm x 110mm, constructed from 350 Micron PVC and coated with EXTRA STRONG adhesive for superior durability.
- Each Test Tag has a unique Tag Number to aid with record keeping.
- Supplied in re-sealable packets of 100 with permanent marking pen.
- Space for; Tested By, Plant/Item No., Licence No., Test Date, Next Test Due.
- Ideal Test Tag for factory environments & construction sites.

All TransNet Tags are manufactured to AS/NZS 3760 and AS/NZS 3012.

Standard Tag

\$13.28

A full range of customised tags are also available. Add your company logo, registration number, barcode, etc, Contact your local rep or customer service for details.

ETI RCBO Super Special!!!

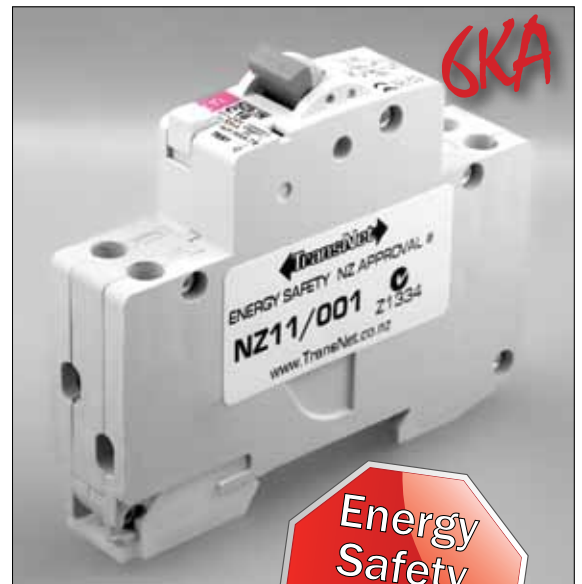

Special applies to 6 & 25AMP, 30MA MODELS ONLY

KEY FEATURES

- Lockable
- Contacts indicator
- Single module width 18mm
- Reduced installation time
- Replace an MCB quickly
- No need to increase board size as replaces MCB

MEASUREMENTS

Rated Current	6 and 25amp*
Rated Short Circuit	6,000A
Tripping Curve	C
Rated Residual Current	30mA
Type of Release	Type A
Terminals	1-10mm
Width	18mm
Standard	IEC 61009
Energy Safety NZ Approval	NZ11/001

END CAPS – HEATSHRINKABLE

Raychem Cable Caps shrink when heated to tightly fit a range of cable sizes and constructions. At the same time a special sealant also melts and flows under the shrinking action, gripping the cable and ensuring a high-integrity moisture seal.

Our advances in materials science ensure that these crosslinked halogen-free polymer products also provide high quality electrical insulation while at the same time resisting abrasion, weathering, and chemical attack.

APPLICATIONS

- Environmental sealing of all cable types
- Resistant to corrosion and decay
- Caps for pressurised and live sealing are available
- Operating temperature range -40°C to 120°C
- Inner adhesive wall
- Sealant lined

Raychem

BREAKOUT BOOTS

Raychem low voltage breakouts are an easily installed, light weight insulation for sealing the crutches of plastic, paper and rubber insulated cables up to 1kV. Made from semi-rigid cross-linked halogen free polyolefin, these medium wall breakouts also offer resistance to abrasion, weathering, and atmospheric pollution.

APPLICATIONS

- For sealing and insulating multi-core cables
- Resistant to corrosion and decay
- Waterproof
- IP68
- Inner adhesive wall
- UV Resistant
- Sealant lined

ALLIGATOR CLIPS & TEST CLIPS

Utilux Battery Charging Clips have a high standard zinc chromate finish suitable for constant potential or series charging.

- All clips feature pan head screws to ensure correct contact with conductor.

CAT NO.	DESCRIPTION	PACK SIZE	PRICE (EXCL GST)
H141/12	NICKEL PLATED BRASS 5AMP CLIP	12	\$31.61
H145/12	10AMP ZINC PLATED STEEL TEST CLIP	12	\$13.96
H170	15AMP ZINC PLATED STEEL TEST CLIP	1	\$3.03
H143/12	25AMP ZINC PLATED STEEL TEST CLIP	12	\$57.94
H144/12	50AMP ZINC PLATED STEEL TEST CLIP	12	\$73.81

Ideal Hamilton/Electrix BBQ Lunch & Product Show

Ideal Hamilton hosted a team of Electricians from Electrix for a TransNet BBQ Lunch and product display on August 29th. Ecolight LED's, Metrel, Gossen Metrawatt & Fluke test and measurement instruments, Raychem gel products & Heatshrink, Stainless Steel boxes plus Utilux mechanical connectors were the order of the day.

All products on display proved of interest but the main purpose of the event was to profile TransNet's extensive range of Heatshrink options, mechanical connectors, Raychem gel products with a focus on the correct procedures for the use of these products. As a result of this BBQ/Show a Heatshrinking and jointing training session with Steve Wiggins has been requested by the Electrix team.

Thanks to the Electrix lads for attending, and to Ideal Hamilton Branch Manager Paul Beautyman & Key Accounts/Project Manager Warren Mackrell for hosting the event.

Kawerau Trade Show at CHH Mills

Mastertrade Kawerau held two mini trade shows at the Carter Holt Harvey Mills in Whakatane and Kawerau in late September to which we were invited to display products. The shows went very well with exceptional interest in our Ecolight LED lighting range.

CHH Whakatane is going to install a number of LEDFLO9-10DC fittings as part of their emergency lighting

system. In addition to this they are looking seriously at using the Ecolight LED High Bay and the 140W AC Flood model throughout the plant. CHH Kawerau is also looking to implement usage of the Ecolight LED 140W AC Flood fitting for their No.2 paper machine to illuminate the cleaning area.

As well as the Ecolight LED lighting display we offered a number of other product ranges such as test &

measurement and the Raychem range of products, one of the most popular being the RDSS – Rayplate Duct Sealing System, this product is tested and proven to seal ducts with or without cables and is very handy when it's imperative an area is kept dry. All in all two excellent events organised by Mastertrade, so thank you to the team for inviting us to be a part of it.

Rob Demonstrates RDSS
