“WHO WE ARE”

Since 1974, Balmoral Engineering has been manufacturing and supplying a range of safety products for the Electricity Industry with a core focus on the prevention of Power Line Strikes.

We are a multi-generation family business with a long term view and partnership approach to working with our Utility customers.

We have forged close relationships not only with our customers, but also our Japanese suppliers who are also a multi-generation family company. For decades these partnerships have developed with a foundation of trust creating bilateral respect and dependable outcomes. This is reflected in the tenure of many of these relationships, some dating back to the companies inception.

RESCUE KITS & ACCESSORIES

ROTAMARKA™

WARNING MARKERS

- Marine grade components

- Reduced line loading by design

- Thermally tested

- UV Resistant

- Soft jaw protects cable and prevents creeping. Fits all lines from 2-50mm diameter

Compliant with AS 3891.2 2018

- Dielectric strength tested

- Snow and ice tested

- Ozone tested

- Wind tunnel tested

- Aerodynamic 3D design, rotates for high impact visibility from all angles of approach

WARNING MARKERS

Choose Eye Ring or Bayonet

Installation Options

This is a guide only, consult our Instructions For Use for further details.
Perform a risk assessment prior to undertaking any work.
Only to be used by industry certified personnel.
Must comply with all relevant work practice rules and industry guidelines.

***4Nm recommended tightening torque**

****Image representative only**

ROTAMARKA™

Warning Marker Drive Tool

WMDT | ~42 x 22mm SS (works with Eye or Bayonet)

Can be installed from Bucket Truck
with Shotgun Stick (Eye version)

Recommended Products

ROTAMARKA Install/uninstall tool - universal - Eye

LLCR-E | ~300 x 55

Can be installed from ground
with Telescopic Stick and
LLCR-E Tool (Eye version)

WARNING MARKERS

ROTAMARKA™

Recommended Products

Power line strikes from construction and agricultural plant and equipment are an all too common occurrence, potentially causing serious injury or death.

These incidents can result in major asset damage and power outages.

Our Rotamarka™ has been specifically designed to mitigate against these risks faced by electrical transmission and distribution companies, as well as contractors and industry workers worldwide.

- Designed with science
- Premium reflectors on all fins
- High internal contrast of fins provides better visibility in a range of environmental conditions
- Less markers required on lines
- Highly tested, designed for durability
- Aerodynamic design rotates for high impact visibility
- AS 3891.2 2018 Clause 2.3.1 (d) compliant
- 3D design provides enhanced visibility from all angles of approach

LINE GUARDS

- Unique striped safety feature

- Stamped & rated to comply with Australian and International Standards

- Robust design and construction backed by decades of engineering to ensure the highest quality & safety standards

- Eyelet in bell housing allows locking by cable ties & complies with WHS requirements

- Weather resistant

- LV & HV options available

- Rigid guards or flexible style hose cater for most requirements

- Suitable for use on Power Lines & Wires as visual warning, mechanical protection and electrical insulation

GLOVES & SLEEVES

LV HV Testing Services Available

- Pure Latex Gloves manufactured under
ISO 9001
ISO 14001

- Certified to EN/IEC 60903 also available in ASTM D120
- Ergonomically shaped excellent strength & durability
- Supreme feel & flexibility
- Outer Protector Gloves custom designed to perfectly complement the Rubber Insulating Glove

ACTIV/ARMR[®]

- Manufactured without the use of solvents & hazardous chemicals utilising a proprietary aqueous dipping process

- Acid resistant
- Ozone resistant
- Low temperature resistant
- Comprehensive range of classes, colours, lengths and sizes, including half sizes
- Various cuff styles available including straight, contour and bell
- Arc flash certified

LV HV Testing Services Available

Outer Protector Gloves should always be worn over Rubber Insulating Gloves to prevent mechanical damage to the rubber gloves. The Outer Protector must be properly sized and shaped to avoid the deformation or damage of the Rubber Insulating Glove. The minimum distance between the cuff of the Rubber Insulating Glove and the cuff of the Outer Protector Glove is listed in the table below "Clearance for Outer Protectors".

Clearance Table for Outer Protectors

Glove Class	Min. Distance Between Outer Protectors & Rubber Insulating Gloves	
	inches	mm
00, 0	½	13
1	1	25
2	2	51
3	3	76
4	4	102

* Allow an extra half inch if cotton inners are to be used

Rubber Insulating Glove Item Number Legend

Example :: RIG-4-18-YB-C-10H

A B C D E F

A - Glove type: RIG (Rubber Insulating Glove)

B - Class: 00/0/1/2/3/4

C - Length: 11/14/16/18 (inches)

D - Colour: R/Y/YB/BY (Red, Yellow, Yellow under Black, Black under Yellow}

E - Cuff: S/C/B (Straight/Contour/Bell)

F - Size: 7/8/8H/9/9H/10/10H/11 (H = ½ sizes)

How to measure

Measure around your hand above the V of the thumb. This gives you the circumference in inches.

LV HV Testing Services Available
