GLOVE SPECS

GET A GRIP ON SAFETY

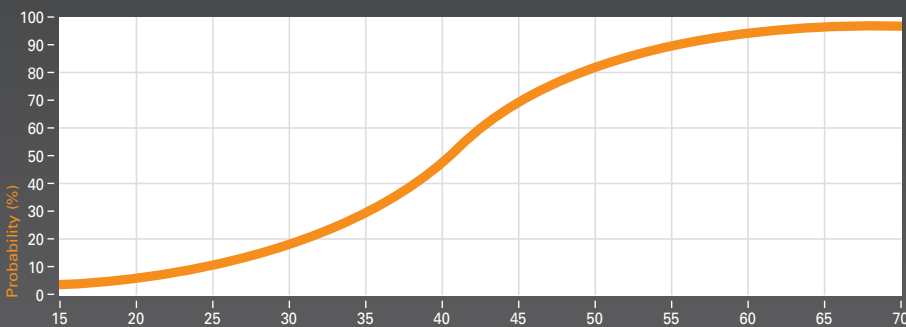

Ultimately linemen know keeping the power on is all in their hands. But ordinary gloves just weren't designed for the real world, in-the-air work they do every day. Ordinary leather protector gloves get slick from wear and the oily residues on line apparatus; maddeningly slippery in foul weather. Linemen need and deserve a better grip on the tools, small parts and apparatus they use, to work more efficiently, keep drop zones safer and get the job done, no matter what conditions the linemen face.

That's why the same team of professional linemen who identified the inadequacies of old fashioned leather protector gloves, helped design, test and perfect The Power Gripz.

The only gloves designed by linemen, for linemen. The only gloves tested and proven to be superior for grip, arc protection, heat penetration and all-weather dexterity. The Power Gripz have been endorsed by Hugh Hoagland, founder and senior consultant to ArcWear.

- The highest leather protector glove ATPV rating in the industry: 40cal/CM².
- Blocks fully 94% of heat penetration in EBT testing.
- Meets and/or exceeds all ASTM F-696/ASTM F-2675 Standards for leather protector glove design.
- Proprietary grip pads (patent pending) provide unparalleled grip without compromising hand dexterity, and safety in all weather conditions.

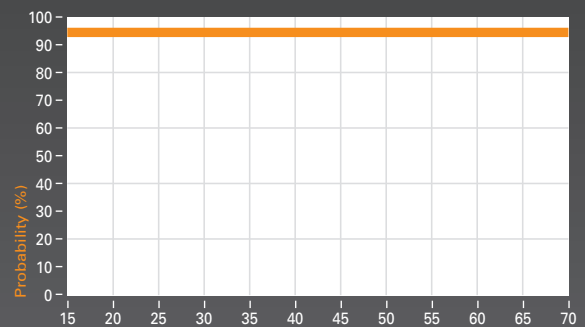

ATPV rating: 40 cal/CM²

Incident Energy (cal/cm²)

Arc Thermal Performance Value (ATPV): Value is presented in calories per square centimeter represents the maximum capability for arc flash protection for a particular arc flash clothing.

HAF rating: 94%

Incident Energy (cal/cm²)

Heat Attenuation Factor (HAF): Denotes percentage of heat blocked by the fabric.

TESTED BY THE **BEST**

Kinetrics is the category leader in providing life cycle management solutions for the electricity industry. Trusted by clients world wide, Kinetrics expertise in testing, inspection and certification is backed by 100 years

of experience in addressing the North American Utility Industry's most challenging technical issues.

ArcWear

ArcWear was founded in 2002 as a world-class Arcflash testing facility for protective apparel for manufacturers across the globe. They are the most experienced and trusted company in Arc testing with a worldwide reputation for reporting accurate and informative results.

Endorsed by the Best

"The Power Gripz could begin to change the utility industry by giving better grip than leather with even better arc protection. Linemen have complained about the poor grip of leather, especially when damp. The Power Gripz could solve these problems without compromising protection."

- Hugh Hoagland

DESIGN

***Ultimate Protection.
Maximum Comfort.
Enhanced Safety.***

Proprietary Scientifically Blended Silicone ribbed fingertip grip pads provide unmatched tactile control of small parts.

Patent pending grip material extends across palms for secure grip on tool handles and gear.

Kevlar stitching with flame retardant quality on all seams for extreme durability, strength and maximum thread count allowed by industry standards.

Reverse rolled cowhide cuff improves safety in an arc fault situation

Specialized cowhide provides arc and heat protection plus superior abrasion resistance while providing all day comfort and dexterity.

100% compliant, meets & exceeds all ASTM F-696 / ASTM F-2675 leather protector glove standards.
APTV rating: 40cal/CM2

The Power Gripz offers a pull strap buckle providing easy adjustment and maximum comfort

THE POWER GRIPZ STORY...

Designed by linemen, for linemen.

They were looking for a better glove. They ended up creating the best glove ever made.

It was a day like any other... just a few veteran linemen swapping stories.

The ranks of professional linemen know the risks of working aloft in all weather, and know their equipment and safety procedures are designed to keep them safe. But, on this particular day, they realized everyone had a shared concern; their existing leather gloves create a sense of insecurity because they just don't provide the grip they need along with the high voltage safety. That got them to thinking; there has to be a glove out there that provides better control on the job, more help with the grip.

Except there wasn't.

So they set out to design a glove that would deliver the safety, grip and control they needed. While researching, testing and perfecting this new design of linemen leather protector gloves, they created the solution for personal safety, efficiency and effectiveness on the job.

They created **The Power Gripz**.

...CONTINUED

The Power Gripz take the industry by storm...

The Power Gripz is proud to offer the most innovative solution to Leather Protectors and Work Gloves to come along in decades. The Industry has welcomed THE POWER GRIPZ with open arms (and hands), since the introduction of the brand.

End users from across the USA, Canada, United Kingdom, New Zealand and more are making THE POWER GRIPZ their protector and work gloves of choice!

We have heard from so many POWER GRIPZ fans. Please keep your emails and phone calls coming and make sure to stop by at a show or rodeo. We could not be more proud than to serve this dedicated group of professionals who know that safety, supreme on the job comfort, dexterity and maximum performance matters.

Those who demand and choose reliable, unsurpassed quality in the tools they put to work... CHOOSE THE POWER GRIPZ .

We look forward to working with you and to serving your hand protection needs for a long, long time.

AT WORK TESTIMONIALS

HERE'S what real people are saying about **THE POWER GRIPZ**

"I have to tell you that the response of having and using your gloves in class has been awesome. I have apprentices that want to buy the gloves on the spot. The apprentices here like them very much and find them to be superior to any glove they currently use in the field."

-Leigh C. -Minnesota

"We have some customers who have shown an interest in your leather protector gloves. Currently we sell a competitors gloves. Could you please send information to us regarding becoming a distributor or where we can locate them. Thank you."

- Kathy S. - New Hampshire

"I'm a power lineman from Canada, and recently came across a fellow lineman from another utility who's company buys your rubber glove covers. My utility currently uses a different protector than yours; and when I tried his Power Gripz, I knew that they were far superior. I would love to get some samples for the linemen at my work to try so that they can see firsthand what the Power Gripz are all about, so that we can change to using your covers exclusively. Thanks in advance."

- Adam - Canada

"We were interested in switching our linemen from the standard protectors over to the Power Gripz!"

- Tim H. - Colorado

"Interested in the gloves, had some linemen attend the conference in Florida and we would like to order some."

- Kenny N. - Utah

"Just heard of these and wondered if you could send a few 10-10.5 and 11-11.5 pairs for my crew to try out. Hoping to have my employer make these the protectors of choice! Thank you, and work safe! My is excited to try them!"

- Paul M. - Pennsylvania

"I'm a journeymen lineman and have been waiting for the day that someone came out with a product like this! Can't wait to try these gloves out. Thank you!"

- John C. - Michigan

THE POWER GRIPZ FIRE, WATER AND CUT resistant work glove

This insulated work glove is made of the finest materials available and is Arc Rated; designed to provide FIRE protection as well as durability & comfort in all weather conditions. This FWR/CUT RESISTANT WORK GLOVE provides superior dexterity ensuring heightened efficiency, productivity and safety. Arc Rated. Flame Resistant. Cut Resistant

Made of high-quality cow skin leather, the entire glove features a cut-resistant liner [ANSI/ISEA 105-2016 Classification Level A4 (ASTM F 2992-15) AND ANSI/ISEA Section 5.1.2 puncture category Level 3 BS EN-388 (2003)] and wristlet made with 100% Kevlar. An inner layer of 3M Thinsulate FR 120 protects from heat/flame exposure. The proprietary POWER GRIPZ grip pad reinforcement on the fingertips, and palm enhance the durability and protection while maintaining high level of dexterity.

Warranty Information:

The Power Gripz protectors/gloves provide the highest available gripping performance on the market; have an ATPV rating of 40cal/CM2; HAF rating of 94%; meet and/or exceed ASTM F696/F2675 standards for leather protectors and block 94% of heat penetration in EBT testing. The Power Gripz is warranted to be free from defects in materials and workmanship, and to meet the requirement of current ASTM standards at time of shipment. Our only obligation will be, at our option, to replace any portion proving defective or to refund the purchase price thereof. The buyer assumes all other risks, if any, such as the risk of any direct, indirect or consequential loss or damage arising out of the use of, or inability to use, these products.

This warranty is exclusive and in lieu of the warranties of merchantability, fitness for particular purpose and all other warranties, expressed or implied, and may not be varied or extended except in writing by an authorized official of The Power Gripz.

The Power Gripz will replace, free of charge, the gloves/protectors that prove to be defective in workmanship or material, when they are: 1) subject to fair treatment, 2) stored correctly, 3) shipping charges are prepaid, and 4) the gloves are returned within 90 days of purchase with original receipt and or PO# referenced and a RMA# from The Power Gripz. Please be advised that this warranty does not cover normal wear and tear or improper use and/or sizing. All return freight charges must be paid by the customer, unless The Power Gripz authorizes otherwise.
