ABOUT TRANSNET NZ LIMITED

TRANSNET COMPANY OVERVIEW

At TransNet we offer a large range of products to the Electrical Distribution, Transmission, Rail, OEM and Wholesale industry. We have the expertise and knowledge to assist with equipment specification as well as providing hands on service and support in the field.

With three stocking distribution facilities in Australasia, and 24hr contact, TransNet is able to offer local support and fast delivery.

TransNet is one of the largest suppliers to our industry in Australasia, offering the most diverse range of products and support. We have a switchgear workshop, an R&D workshop and a Raychem kitting room on site in our Auckland Head Office and we are well equipped to offer training and support for all our products.

At TransNet we pride ourselves on the ability to react quickly to any situation and have product to you whenever and wherever you need it. Our staff are knowledgeable and happy to help, we have a number of technical specialists in a range of product areas, all ready to assist if and when required.

As the sole New Zealand Distributor of TE Connectivity Energy products including brands such as Raychem, Utilux, AMP and Guro, we have the local and international support and expertise of one of the largest manufacturers in our business. TE Connectivity Energy has a research and development programme second to none, continuously improving existing products, while designing and testing new products to improve network reliability. We are proud to offer an extensive range of quality brands from around the globe for a holistic approach to supply in the electricity industry.

ENVIRONMENTAL RESPONSIBILITY

TransNet takes environmental responsibility seriously and as part of our commitment to the environment we have implemented a range of policies and practices to do our part in protecting the environment. We

have achieved ISO14064-1 accreditation for quantification and reporting of GHG emissions and removals. In addition to this, we have the first and only fully functioning Micro Grid of its kind in New Zealand right here at our head office, with 150kW of solar generation and a 30kW/130kWh smart storage system, we're able to power our entire operation for most of the day.

We're already moving to reduce our impact even more by adding electric vehicles to our fleet and using our solar farm to charge them.

THE TRANSNET DIFFERENCE

WHENEVER, WHEREVER, WE'VE GOT IT - PRODUCT RANGE

- Almost 20 years supplying to the electrical industry
- 100% privately New Zealand owned and operated
- Three stocking locations in Australasia
- R&D workshop, Switchgear workshop & Raychem kitting room
- Extensive stock holding for superior emergency response
- Quality products sourced from reputable brands from around the world

TUDS DISTRIBUTION PIT

TUDS325S - DISTRIBUTION SERVICE PIT

TUDS offers unprecedented flexibility to the placement of distribution service demarcation points for utilities. Designed specifically for the New Zealand market, this system considers and accommodates the many challenges faced by asset owners when building and maintaining LV networks.

TUDS lids latch into place and require a tool to access them. If the latch alone is not adequate for your requirements, we have a stainless steel spring lock available, which when fitted, is operated by a special triangle access key. The spring action ensures the lid is never left “unlocked”.

FEATURES

- No cutting of main cable – keeps resistance low and reduces amount of main cable required (no looping in & out)
- Tested to withstand 80kN downward force
- Completely submersed/ground mount – protected from impact and vandalism, space saving
- Up to 100amp fusing
- Multiple security levels available – latch and key lock
- Sturdy and UV stable – manufactured in NZ from the best materials and tested to ensure longevity
- Individual parts & complete kitsets available
- 1ph, 2ph and 3ph kits with and without mains breach joint
- Additional fuses can be added if required
- Lockable lids are available if required
- Two styles of base are available (one is NZTA approved)

EARTH ROD INSPECTION BOX

TNERIB - EARTH ROD INSPECTION BOX

Main earth connections are an integral part of a safe installation and until recently protecting them seemed a bit of an afterthought - the main earth connection needs to be accessible but also protected to ensure the integrity of the connection isn't compromised. The main earth connection in domestic installations often ends up in garden beds or on footpaths outside the house. The best way to protect the connection, while at the same time allowing unobstructed access for later inspection, is to cover it with a purpose-built inspection box.

TransNet has engineered a product specifically for this - the TNER-IB, custom-designed inspection box with a hinged latching lid for easy access. This specially designed lid is strengthened for longevity and to enable easy installation in footpaths where it blends well with paving.

FEATURES

- Heavy duty strengthened, hinged lid for secure placement
- Lid latches closed
- Must use tool to prise lid off
- Made from UV stabilised polypropylene
- Easy to identify with embossed lid detail
- Designed and manufactured in NZ
- Dimensions: 120mm X 120mm X 200mm tall

PRODUCT INFORMATION

Product Code	Description	Dimensions (mm)
TNERIB	Secure, Hinged Lid, Earth Rod Inspection Box	120 x 120 x 210

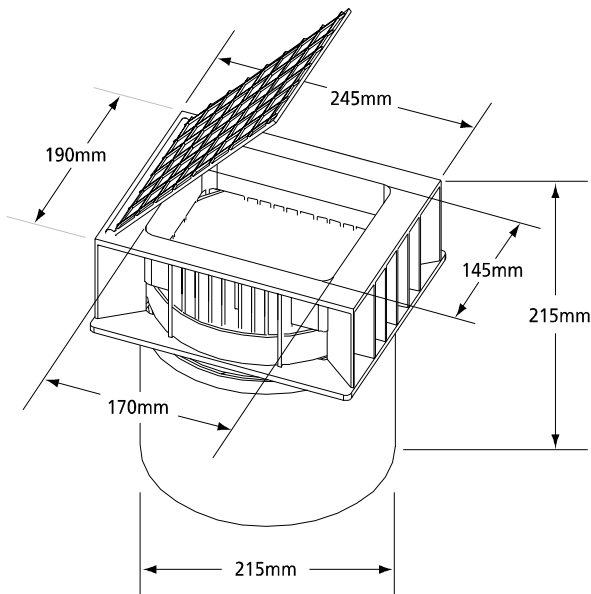

EARTH ROD INSPECTION BOX

C2000930 - ERICO EARTH ROD INSPECTION BOX

The ERITECH PIT03 (C2000930) offers a high level of protection for critical grounding terminations through the use of its lockable lid. Ease of maintenance of the ground termination is gained by way of the large working aperture once the lid is unlocked using the security key. Due to its lightweight robust construction the ERITECH PIT03 can withstand 5 tonnes making it ideal for installation in heavy traffic areas.

FEATURES

- Offers a high level of protection for critical grounding terminations through the use of its lockable lid
- Easy-locking lid only opened with security key
- Ease of ground termination maintenance due to large working aperture
- Lightweight design allows easy handling, storage and transportation
- Suitable for both paving and hot tar applications
- UV-stabilized against degradation by sunlight
- Non-brittle to prevent cold weather damage
- Base designed to accommodate Grounding Busbar for Inspection Housing (545135)

Clear Identification Plates

FIBRE/TELCO GRADE LEVEL BOX

PE9HDHK FOR FIBRE & TELECOMMUNICATIONS

Because they're so versatile, these Buried Cable Enclosure Pit are widely used in electrical, telephone and water industries. Made of high density polyethylene structural foam, this rigid enclosure is lightweight and easy to handle.

Channell have truly thought of everything, there is an option to have 'Broadband', 'Telecommunications' or a Blank labeled lid, please let us know at time of order. We can also discuss options around including your company logo (quantity dependent, but please talk to us if this is something you are interested in).

FEATURES

- HDPE Plastic Base & Lid
- Flush insert Lid mount
- Pedestrian grade box (< 1ton loading)
- Branding or descriptive labeling available
- Volume = 75L
- L-Bolt Cover

STANDARDS

Specification	Load Category	Performance Category	Application (Installation / Location)	GVM (kg)	Nominal Wheel Load (kg)	Design load (kN)	Test Load (kN)

MAINS STREET LIGHT PIT SYSTEM

SUBMERSIBLE FUSED ELECTRICAL SUPPLY TO LIGHT POLES

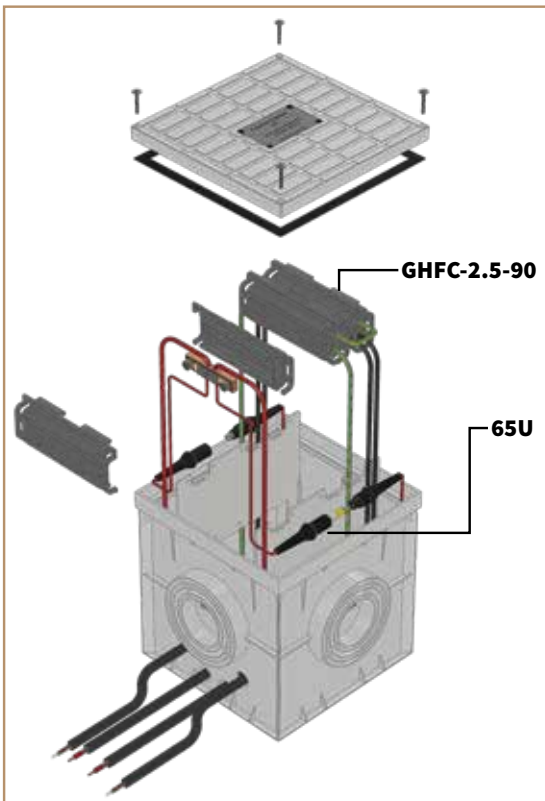

The Street light pit is a submersible cable break out system with fused supply to light poles and auxiliary items such as CCTV, WiFi, Telecom signal boosters. This pit system is approved by Auckland Transport for all Street light poles where the “Gear Door Opening size” is less than 120mm x 200mm, or where there is limited space for cable loops and multiple fused supplies within the street light pole.

Fully submersible pit system designed specifically for New Zealand applications.

As used by;

PIT

- Dimensions: 300x300x300mm
- Colour: Grey
- Material: Polypropylene / UV Stable
- Breaking Load: 4.8kg/cm²
- Security: 4x Torx Stainless Steel Anti-tamper Screws

ELECTRICAL

- Connections: Via 165A rated Copper Bus
- Fuse Holders: 65U Fully Submersible Fuse Carrier (Range taking 2.5mm² - 16mm²)
- Fuses: 10x38mm Barrel Type
- Sealing of Connections: Raychem Gel Enclosure (GHFC-2.5-90)
 - Easy Re-entry
 - Rugged Protection
 - Submersible

ABOUT CHANNELL

CHANNELL COMPANY OVERVIEW

Channell Commercial Corp., is a fourth generation US based company which prides itself as an innovator in design and manufacturing of Outside Plant equipment for the telecommunication, broadband, power, ICT roads, water, rail, mining and cable TV industries. Established in California in 1922, Channell clients are in diverse industries and span the globe. Wherever and whenever buried or aerial cabling infrastructure is required, Channell is there.

Channell is an ISO 9002 certified company headquartered in Rockwall, Texas, USA with manufacturing, regional warehousing and sales located across the globe including, California, Texas, Canada, UK, Indonesia, Malaysia, Mexico, Australia and New Zealand.

The Channell sales force combined with in-country partners, market and sell OSP products across the globe including some of the largest telecommunications companies in the world.

Channell is a major provider of thermoplastic boxes, advanced copper connectivity, termination and distribution products as well as fibre connectivity and management systems, heatshrink and cable vaults both above and below ground.

Channell products provide peace of mind with secure and robust enclosures, chambers/hand-holes and housings ensuring reliability and protection for the most vulnerable points in an underground cable network.

DESIGNED, MANUFACTURED AND TESTED IN THE USA

All Channell products are designed, manufactured and tested in the USA to the highest quality standards.

Manufacturing is based in Rockwall, Texas where a new state of the art facility was commissioned to accommodate the requirements of Channell's precise manufacturing processes.

CHANNELL PRODUCT SUMMARY

THE NEW SOLUTION - BULK SERIES

With over 90 years experience in global Outside Plant infrastructure, Channell has developed the most advanced pit and chamber technology in the world! Channell's BULK and SHIELD patented designs with the complement of SUPER BULK for roadway applications offer global users, consumer, and craft installers safety benefits never before contemplated, but critical when considering new global health and safety standards.

BULK's lightweight design increases installation efficiencies while improving overall body weight carrying load capacities versus concrete, polymer concrete, and many other body materials. Reduction of BULK's body weight protects the safety of installers while shortening installation times. Additionally, with BULK bodies, cutting ducts in the field produces no harmful dust contaminants which could lead to installer respiratory issues.

All SHIELD covers meet or exceed 15,308kg force or 150kN in strength. They never break and offer a lid weight reduction over concrete and polymer concrete of 50%, and over 70% when compared to cast iron. SHIELD's lighter weight design cover reduces craft injuries while improving health and

safety specifications.

Consumers also benefit from SHIELD's patented anti-slip design and anti-trip features. SHIELD's cover tread design raises global industry standards by offering 20% greater slip resistance when compared to concrete, polymer concrete, steel or cast iron covers. SHIELD meets and exceeds Australia AS4586 skid specification, the highest global standard in the world!

Overall, BULK's strength in combination with Channell's SHIELD covers offers a universal solution to meet and exceed every company's needs. Safety always comes first, and that's why BULK and SHIELD are tested to the highest standards available in the global market and Channell is proud to have pioneered Endurance Stress Testing (EST™) which analyzes cover fatigue in the field. EST™ provides essential data on the life expectancy of a SHIELD lid in the field and confirms its potential life expectancy. Product design, product innovation, safety attributes, and new manufacturing technology is why global customers are specifying Channell's BULK and SHIELD products for their new Outside Plant infrastructure requirements.

CHANNELL APPLICATION & TESTING

VERSATILITY OF A CHANNELL PIT

ELECTRICITY SERVICE PIT - The Channell range can accommodate service fuses. Fuses can be stacked, secured and organised for ease of re-entry.

ELECTRICITY LINK BOX - Link pillars are big, awkward and intrusive, using a Channell pit and teaming it with TE's Tappat Link box components, you can create an aesthetically pleasing installation with little to no visual impact on the street-scape.

TELECOMMUNICATIONS & FIBRE - Probably the most common use is for telecommunications and fibre installations. These pits have special features inside to assist with protecting delicate fibre optic cables.

SEWERAGE - With the extensive range of Channell pit sizes, these are often installed for access to sewers around municipal areas

WATER - Channell pits offer a great solution for the water utility contractors too, with a range of sizes to suit, these pits are secure and user friendly.

Channell Bulk pits can be modified to cater for any application. If you don't see your application listed here, please contact us to discuss a customised solution.

RIGOROUSLY TESTED

Channell products are tested beyond all international standards across all rated classes as a complete manhole and cover assembly.

Testing is undertaken in a specialised facility and the following tests are undertaken;

- Vertical Centre Load Test
- Side Wall Load Test
- Box Lateral Side Wall Load Test

Channell Bulk pits can be installed in roadways (as long as the correct lid variant is selected for the traffic levels) without concern.

Test reports are available on request.

PRODUCT SELECTION GUIDE

BULK SERIES COVER SETS

SHIELD COVER SETS

SHIELD covers are designed to never break! They offer a lid weight reduction of 50% over concrete and polymer concrete, and over 70% when compared to cast iron. SHIELD's lighter weight design cover reduces craft injuries while improving health and safety specifications. Consumers also benefit from SHIELD's patented anti-slip design and anti-trip features. SHIELD's cover tread design offers 20% greater slip resistance when compared to concrete, polymer concrete, steel or cast iron covers. SHIELD meets and exceeds Australia AS4586 skid specification, the highest global standard in the world!

FEATURES

- EST™ (Endurance Stress Testing) 3 Million Cycles
- Designed to meet or exceed:
150kN = 15 tnf (Tons-force)
- Telecordia GR-902-CORE
- Western Underground Committee Guide 3.6
- ANSI/SCTE 77 2013-TIER 22
- EN124 Class B125

SHIELD COVER SET STANDARDS

SHIELD cover sets comply to the following standards

SPECIFICATION	LOAD CATEGORY	PERFORMANCE CATEGORY	APPLICATION (Installation / Location)	GVM (kg)	Nominal Wheel Load (kg)	Design load (kN)	Test Load (kN)
AS/NZ 3996:2006	Class A	Light Duty Pedestrian Only	Non-vehicular traffic limited to pedestrians & cyclists. Areas closed to other traffic	670	335	6.7	10
AS/NZ 3996:2006	Class B	Medium Duty Non-Deliberate (Incidental) Traffic	Areas where vehicular traffic is limited to footways and light tractor paths or livestock	5,300	2,650	53	80
AS/NZ 3996:2006	Class C	Heavy Duty Deliberate Traffic	Areas open to slow moving vehicular traffic including commercial vehicles	10,000	5,000	100	150

BULK SERIES COVER SETS

DUCTILE IRON COVER SETS

FEATURES

- DUCTILE IRON Covers and Vaults designed to work in : “Deliberate Traffic” - carriageway applications
- Designed to meet or exceed 250kN = 25 tnf (Tons-force) (actual meets EN124 Class C250 : 250 kN)
- Endurance Stress Test (EST) D.I Covers exceeds **several hundred million** cycles of design loads without failure.
- Anti Skid Tread Pattern that meets or exceeds industry standards for the cast iron industry
- Specialised locks for high security
- Galvanized steel welded frame, Reo Steel kitsets, designed to support loads applied to Ductile Iron cover which are certified to exceed 275 kN.

SUPERBULK Ductile Iron Cover Sizes:

- SUPERBULK 3 - 1730 by 24” = 1 piece iron cover
- SUPERBULK 4 - 2436 by 24” = 2 piece iron cover
- SUPERBULK 6 - 2476 by 36” = 4 piece iron cover
- SUPERBULK 7 - 3048 by 36” = 3 piece iron cover

DUCTILE IRON COVER SET STANDARDS

DUCTILE IRON cover sets comply to the following standards

SPECIFICATION	LOAD CATEGORY	PERFORMANCE CATEGORY	APPLICATION (Installation / Location)	GVM (kg)	Nominal Wheel Load (kg)	Design load (kN)	Test Load (kN)
AS/NZ 3996:2006	Class A	Light Duty Pedestrian Only	Non-vehicular traffic limited to pedestrians & cyclists. Areas closed to other traffic	670	335	6.7	10

AS/NZ 3996:2006	Class C	Heavy Duty Deliberate Traffic	Areas open to slow moving vehicular traffic including commercial vehicles	10,000	5,000	100	150
AS/NZ 3996:2006	Class D	Heavy Duty Deliberate Traffic	Areas open to commercial traffic. Carriageways of roads	>14,000	7,000	140	210

BULK SERIES COVER SETS

INFILL COVER SETS

FEATURES

- INFILL Covers and Vaults designed to work in : “Deliberate Traffic” - slow moving vehicular applications
- Designed to meet or exceed: 150kN = 15 tnf (Tons-force)
- Constructed of hot dipped galvanised steel
- Where aesthetics really matters - the Channel Infill covers blend in with the existing pavement texture.

INFILL COVER SET STANDARDS

INFILL cover sets comply to the following standards

SPECIFICATION	LOAD CATEGORY	PERFORMANCE CATEGORY	APPLICATION (Installation / Location)	GVM (kg)	Nominal Wheel Load (kg)	Design load (kN)	Test Load (kN)
AS/NZ 3996:2006	Class A	Light Duty Pedestrian Only	Non-vehicular traffic limited to pedestrians & cyclists. Areas closed to other traffic	670	335	6.7	10

BULK 2 SERIES PITS

TECHNICAL SPECIFICATIONS

FEATURES

- Upgradeable
- Lightweight/Strong (TIER 22)
- Patented Anti-Slip Technology
- Anti-Seize Bolt Technology
- Industry Leader in Anti-Trip Hazard Prevention
- Highest Load Rating to Weight Ratio in the Industry
- Superior Fatigue Resistance (EST)[™]
- Vertical and Horizontal Rib Design
- Embedded Vertical Racking
- Reduced Installation Cost

TESTING CRITERIA

Covers meet or exceed:

- EST[™] 3 Million Cycles
- Telecordia GR-902-CORE
- Western Underground Committee Guide 3.6
- ANSI/SCTE 77 2013-TIER 22
- EN124 Class B125

Bodies meet or exceed:

- Telecordia GR-902-CORE
- Western Underground Committee Guide 3.6
- ANSI/SCTE 77 2013-TIER 22
- EN 124 Class B125/C250
- ASTM-457
- AASHTO M-306 (H-20/25)
- AS3996-Class B/C
