

CABLE JOINTING TOOLS

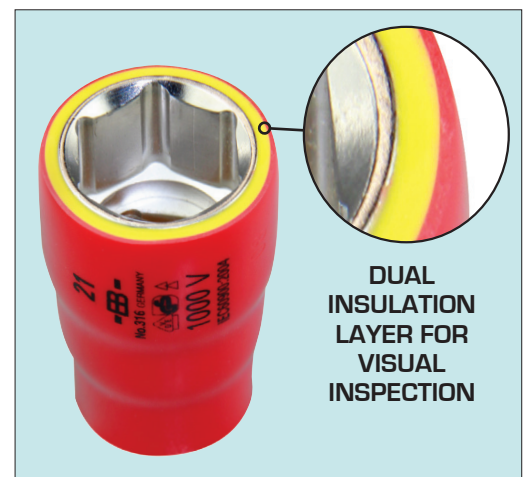

– INDIVIDUAL TOOLS AND COMPLETE KITS

The **CABLEJOINTINGKIT** is a kit suited to jointing cables on LV and MV networks, prepared by Cable Jointers for Cable Jointers. Packed in a custom made canvas tool roll to keep the insulation protected, the **CABLEJOINTINGKIT** has a range of tools specific to preparing and terminating cables. Specific tools for MV and HV applications can be selected and purchased individually on their own merits, such tools include those designed for preparing MV and HV cables with semi-con layers.

All insulated tools sold by TransNet are tested in accordance with IEC 60900:2004 and are rated to 1000V. The double insulation layer offers a visual confirmation of the integrity of the insulation as the inner layer is yellow and the outer layer is red, any damage will be obvious during visual inspections.

Having these additional tools available for purchase separately if desired is an added bonus. The range is extensive and we understand personal preference is important with Cable Jointing.

We understand that there are more than one way to do things, customise your own kit based on your preferences from our extensive range of products so you get exactly what you're looking for.

For custom kits and other information please contact our technical team on **0800 RAYCHEM**

MV STRIPPING TOOLS INCLUDE...

- INSULATION REMOVAL • CHAMFERING • SEMI CON REMOVAL • OUTER SHEATH REMOVAL
