

EV CHARGER PEDESTAL

PEDESTAL FOR WALLBOX EV CHARGE STATIONS

In applications where there is no wall to secure a charge station, the TransNet e-Mobility EV pedestal is the perfect solution. Designed to accommodate up to two Wallbox charge stations in each unit, these pedestals offer a cost effective, yet visually appealing and robust solution.

FEATURES

- Powder coated Aluminium frame
- Standard Pedestal dimensions (mm): 1530H x 298W x 150D
- Sturdy base plate to fasten in place
- Customisable Perspex panels laser cut to fit desired charger configuration
- Standard Wallbox branding on panels, or customise to suit your requirements
- Visually appealing
- Designed with the electrician in mind, these units are very simple to work on
- Can be supplied complete with charge stations (additional cost)
- Custom sized pedestals and inverted installation also available on request
- Quality materials chosen for durability
- Designed and manufactured in New Zealand

STANDARD PEDESTAL OPTIONS

- Black or Green-edge clear Perspex Wallbox branded panels
- Custom branded panels available - contact us to discuss
- One or two cutouts for any of the Wallbox range of chargers (One or Two on Front or Back. Or one cut out on each panel)

CHARGER OPTIONS

- Standard Pedestals accommodate up to two charge stations each
- Designed to accommodate any of the Wallbox AC chargers (Commander 2, Copper SB, Pulsar & Pulsar Plus)
