## GelPact Covers AMPACT Taps

Tyco Electronics' GelPact covers provide corrosion protection for AMPACT aluminum taps in severely corrosive environments such as coastal or heavily polluted areas. GelPact covers will prevent corrosion from forming on newly installed AMPACT taps in aerial applications. For previously installed AMPACT taps, installing a GelPact cover will help to arrest the progress of any corrosion that might be forming in the tap.

Made of sturdy, black, UV stable plastic. GelPact covers are provided in packs of 18 for white and blue and in packs of 12 for yellow. These covers are ready to snap on quickly and start providing corrosion protection for your electrical network.

### Easy to Select

Just three sizes of GelPact covers accommodate the entire AMPACT tap product line. GelPact W-sized covers fit all white coded taps. GelPact B-sized fits all blue-coded AMPACT taps, while GelPact SMY-sized covers fit 336 up to 605 mcm.

### Easy to Install

Remove O rings from and simply align the two half shells together around the AMPACT tap and snap them together with your hands. Assemble cable ties through the slots and tighten. There's nothing to cut, no loose parts to drop, and no tools required.

### Easy to Re-enter

To remove the GelPact cover, just cut the cable ties and tabs. Pry the two half-shells apart with a screwdriver.

### PowerGel Sealing Gel Technology

GelPact cover kits feature revolutionary PowerGel sealing gel which provides an excellent moisture seal over a wide temperature range (-40 C to 105 C). PowerGel sealing gel offers excellent insulating properties and acts as a vibration damper, as well.

 **Tyco Electronics**

Our commitment. Your advantage.
