

# EYE BOLT CONNECTOR

– FOR SURGE ARRESTORS

Eyebolt connectors are the answer when an unbroken lead through the surge arrester is required. The lead can come from the DDO to the surge arrester and on to the transformer without having to be cut, lugged and stacked onto the stud.

This connector simply attaches to the surge arrester stud and allows the lead to be clamped on its way through.

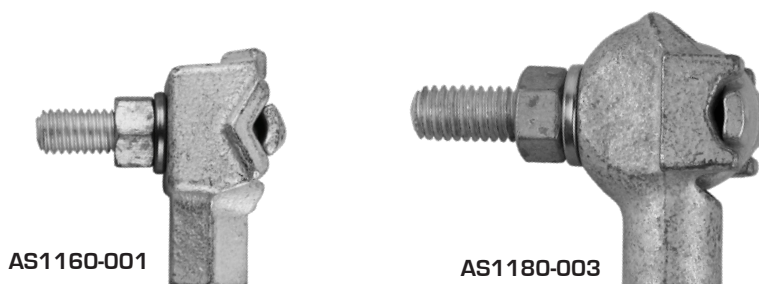

## FEATURES

- No need to cut and terminate the lead on to the arrester
- Reduces an chance of resistance caused by cutting and terminating the lead onto the stud
- Will accommodate leads from 6-150mm<sup>2</sup> (AS1180-003 only)
- Models available to fit 3/8" studs
- Two position eyebolt allows parallel or perpendicular conductor installation
- Can be easily removed without damage to the conductor

## MATERIALS

- Tin Plated Brass

AS1160-001

AS1180-003

CAT NO.	CABLE SIZE [mm <sup>2</sup> ]	STUD SIZE
AS1160-001	6-70mm <sup>2</sup>	TO FIT 3/8" STUD
AS1180-003	6-150mm <sup>2</sup>	TO FIT 3/8" STUD
