

IET15M

- INDEPENDENT EARTH SPIKE & REEL

Designed to attach to any voltage tester, this reel and spike boasts 15m of lead and a sturdy spike to easily pierce even the hardest ground. The T handle ensures the tester cable is protected if force is required when penetrating hard ground.

Simple to use, the Independent Earth Tester Reel and Spike has a connection point on the end of the lead to simply poke the tester probe into. The beauty of this set up is if your tester or lead fail you can easily replace them without having to replace the entire unit.

The spring operated bearing on the reel makes winding the lead user friendly and easy without twists and tangles.

FEATURES

- 15m green/yellow lead
- Sturdy Stainless Steel spike with 'T' handle
- Spring and bearing to help wind cable back in without twists & tangles
- Universal tester connection point (Tester sold separately)
- Comes tested and tagged for immediate use

IET15MMD1160

- INDEPENDENT EARTH SPIKE & REEL WITH VOLTAGE TESTER

IET15M with permanently connected MD1160 voltage tester. Metrel MD1160 is the premium voltage tester in the range, it offers CAT IV / 600 V protection and an LCD display and work light.

Having the unit permanently connected enables users to grab just one piece of equipment from their vehicle, no chance of mis-placing any part of it, as it's always together.

No chance of probe mismatch or damage whilst connecting to lead.

Tester and lead can not become disconnected during testing.

Tester and lead tested as one unit offering certainty of connection.

MD1160 FEATURES

- IP64-protection degree
- CAT IV 600 V
- Automatic AC/DC recognition

MD1160 STANDARDS

- Conforms to GS38
- DIN VDE 0411
- IEC/EN 61243-3:2014
