

Zerust®

Anti-Corrosion Non-Slip Liners

Durable, reusable corrosion protection

Keep your tools or parts in place and organized while protecting them from rust and corrosion!

Zerust® Anti-Corrosion Non-Slip Liners combine proprietary Zerust® ICT™ corrosion inhibiting formulations with a non-slip PVC (polyvinyl chloride), a rubberized plastic material, to provide superior corrosion protection and slip prevention. These liners are perfect for keeping tools, metal parts and equipment in place and rust-free! Use with your tool box, work bench, drawers, shelves and other work or storage areas.

Zerust® Anti-Corrosion Non-Slip Liners are available in 24" x 48" rolls, but can be cut to custom fit your application.

Keeps tools organized and rust-free!

Zerust® Anti-Corrosion Non-Slip Liners keep your parts organized by preventing shifting, slipping or sliding, and help protect the tool box, shelf or drawer from the scratching and denting of everyday use.

Zerust® Anti-Corrosion Non-Slip Liners stop corrosion by releasing an invisible, odorless and non-toxic corrosion inhibiting vapor into the air. The molecules of this vapor will settle on exposed metal surfaces inside of the tool box or drawer, and protect the metal contents from corrosion.

Zerust® Anti-Corrosion Non-Slip Liners protect multiple metal types from corrosion and rust for up to 2 years (see reverse side for a list of metals protected).

Zerust® Anti-Corrosion Non-Slip Liners are odorless and non-toxic. They are also fire retardant, mold and mildew resistant.

Zerust® Anti-Corrosion Non-Slip Liners have no coating of chemicals that will flake off, stick to or otherwise damage the products they are supposed to protect.

Keep tools organized
and rust-free!

How to use Zerust® Anti-Corrosion Non-Slip Liners

Simply cut the non-slip liner to fit your tool box, drawer or enclosure, place objects on top of the liner, and close the drawer or box. Make sure that air flow is restricted inside of the enclosure to maximize corrosion protection.

Applications

Use Zerust® Anti-Corrosion Non-Slip Liners in place of any plain drawer liners, storage bags or polyethylene film in applications where non-slip and corrosion protection properties are desired. Use to protect quality measurement instruments, equipment, tools, spare parts, silverware, etc.

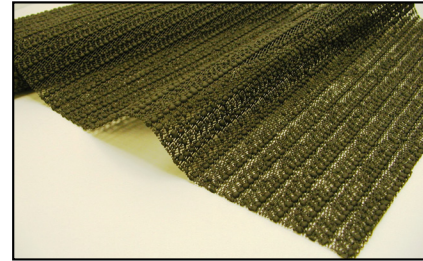

Sizes and Availability

Item	Size	Thickness	Color	Item Number (case)
Zerust® Non-Slip Liner	24" x 48"	1/16"	Black	500-M-00001

24 rolls per case. Minimum order quantity: 1 case.

Weight of Product: Each: 5.6 oz.
Case: 10 lbs. (with external packaging)

Custom sizes available for orders over 16,000 sq. ft. Width of custom sizes must be divisible by 12, with a maximum width of 144 inches or 12 feet.

Physical Data

Metals Protected From Corrosion		Multimetal
		Steel, Cast Iron, Chrome, Tin, Zinc, Copper, Brass, Bronze, Aluminum-Copper / Manganese Alloys, Aluminum-Zinc / Manganese Alloys
Stability	This product is stable under normal storage and shipping conditions. Avoid contact with flames, acids, and strong oxidizers or solvents.	
Shelf Life and Effectiveness	Estimated shelf life of 2 years if stored in original external packaging at 85° F (30° C) or less (do not store in direct sunlight). Subsequent in-service life of 2 years.	
Radius of Protection	1 m ² (10.76ft ²) of Zerust® Non-Slip Liner will, depending on application conditions, protect an area of 2-3 m ² (70-105 ft ²).	
Disposal Method	Dispose of in a landfill, or recycle by re-cutting or re-shaping for use in another application (consult federal, state or local regulations).	

Important information

Multimetal objects will be protected for up to 2 years as long as they remain inside of an enclosure with the Zerust® Anti-Corrosion Non-Slip Liner (using the liner inside of tool boxes or drawers).

Things to remember when using Zerust® Anti-Corrosion Non-Slip Liners:

- Clean tools or parts prior to storage with the Zerust® Anti-Corrosion Non-Slip Liner.
- Do not store in direct sunlight or in extreme temperatures.
- Do not coat the product with any substance such as oil.
- Keep the drawer or tool box closed when not in use to restrict airflow and maximize corrosion protection.
- For additional corrosion protection, add other Zerust® products such as Zerust® Plastabs or Vapor Capsules.
- To wash the product, simply wipe clean with a soapy cloth.

We guarantee this product conforms to production specifications and was made in accordance with documented ISO 9001 Quality Procedures. We expressly disclaim responsibility for its use. We make NO WARRANTY OF ANY KIND, EXPRESSED OR IMPLIED, as to the effects of use (including, but not limited to, damage or injury) or the results to be obtained, whether or not used in accordance with the directions. Buyer / user agrees that, if product proves to be defective, Seller's obligation shall be to replace or refund the purchase price of such product at Buyer's option. Seller shall not be liable in tort or contract for any loss or damage, incidental or consequential.
