

Zerust® Capsules are used in applications where traditional anti-corrosion products can not be used due to shape or accessibility. Use to protect hard to reach areas of control panels, electrical distribution cabinets and other enclosures and enclosed spaces, even when they are in operation.

The main cause of premature equipment malfunctions are oxidation and corrosion. They originate long before any surface color changes are perceived visually. Use Zerust Vapor Capsules to prevent electronic equipment corrosion problems.

Zerust diffusers emit Vapor Corrosion Inhibitors (VCI) that prevent oxidation of the metal surface that causes rust. Vapor Capsules prevent corrosion and extend the service life of equipment and reduce equipment maintenance and downtime.

Zerust capsules are quick and easy to install. Simply peel back the protective paper from the adhesive tape and install securely in desired location. Tightly seal the enclosure to trap protective vapor inside. Metals will be protected from rust and tarnish for up to one or two years depending on the capsule model.

Application Example

A Vapor Capsule protects an electronics enclosure from corrosion during operation. The capsule has been marked with the installation date so operators know when to replace it with a new capsule.

Benefits

Safe* and effective corrosion protection where traditional anticorrosion methods can not be used.

Easy to install, economical to use.

Does not affect the circuit boards or sensitive components.

Suitable for new equipment and to protect the reliability of existing equipment.

Application Type

Storage Shipping During Operation May be used with Zerust Packaging

*Safe for people. This product does not pose a health hazard to users due to its classification as an article according to UN GHS, US OSHA HazCom and CA WHIMS regulations. Check REACH SDS for classification in EU.

Specifications

Product Information	Zerust [®] Capsules are VCI (Vapor Corrosion Inhibitor) diffusers. The capsules are made from recycled PE materials.		
Appearance	PE-plastic capsule and foam or protective foam containing active pellets.		
Protection Volume	See table below		
Protection Duration	See table below		
Storage	Store in a cool, dry place and away from sunlight for up to 2 years.		
Protected Metal Types	Multimetal protection for steel, iron, zinc and galvanized steel, copper, brass, bronze, aluminum (and alloys), nickel, tin, solder.		

Availability

Zerust Vapor Capsules are in stock for immediate delivery, sold in cases:

Model	Units/Case
VC 1-1(s)	50
VC 1-1	50
VC 2-1	25
VC 2-2	10
VC 6-1	4
VC 6-2	4

Protection Capabilities*

	Protection	Protection	Protection
Model	Volume	Radius	Duration
VC 1-1(s)	4 ft ³ (0.12 m ³)	1 ft (30 cm)	1 year
VC 1-1	4 ft³ (0.12 m³)	1 ft (30 cm)	1 year
VC 2-1	35 ft³ (1 m³)	2 ft (60 cm)	1 year
VC 2-2	35 ft³ (1 m³)	2 ft (60 cm)	2 years
VC 6-1	900 ft ³ (25 m ³)	6 ft (200 cm)	1 year
VC 6-2	900 ft ³ (25 m ³)	6 ft (200 cm)	2 years

^{*} Protection ratings are based on the highest average tested protection properties and are not guaranteed. Results may vary according to usage environment and metal surface properties such as contaminants.

Safety

- Safe for people. This product does not pose a health hazard to users due to its classification as an article according to UN GHS, US OSHA HazCom and CA WHIMS regulations. Check REACH SDS for classification in EU.
- Zerust VCI chemistry is safe for sensitive electronics. No galvanic effects, residues or changes in the properties of metals. The protective molecules dissipate upon opening of package.
